

CarbonAi announces Bob Pritchard as Advisory Board Member

Calgary, Alberta | October 7, 2021

CarbonAi is excited to announce that energy business executive Bob Pritchard has joined CarbonAi's Advisory Board.

Bob has over 40 years of experience in the energy sector, most recently as a founder and executive of Wolf Midstream, a Canadian energy infrastructure development company and a leader in the Carbon Capture Utilization and Storage space. Prior to Wolf, Bob was a founder and executive of Mistral, a private midstream company that was an early champion of waste heat-to-power projects. Prior to Mistral, Bob was an executive with Taylor, a public partnership that owned and operated assets in the Canadian midstream sector.

He has a proven track record in running successful enterprises in the Canadian oil and gas and energy sector. Mr. Pritchard will provide growth and financing advisory support in CarbonAi's international GHG mitigation project portfolio. "Mr. Pritchard brings a wealth of knowledge and experience to our team and we are excited to have him on our Advisory Board. We are looking forward to working with Bob on the growth of CarbonAi. Bob's executive experience will help accelerate our project delivery into the international emission reduction markets" - Ryan Arsenault, CEO & Founder CarbonAi.

Mr. Pritchard holds a Bachelor of Science in Engineering from Queens University where he graduated in 1980. He holds a professional engineering designation in the province of Alberta.

About CarbonAi

Headquartered in Calgary Canada, with representative offices in the United Arab Emirates, CarbonAi is engaged in accelerating and automating emissions reductions.

CarbonAi is focused on turning the global challenge of climate change and associated emission reduction obligations into strategic opportunities. The Company supports target partners and sectors with visualizing emissions, understanding complex regulations, implementing effective solutions, and managing ongoing inspections, data requirements, and audits. In addition to our suite of technology solutions, CarbonAi is also actively engaged in large-scale, international emission reduction projects.
